PROFILE SUMMARY

Senior Java Backend Engineer with 7+ years of experience designing and building scalable backend systems across e-commerce, marine insurance, and POS (Point-of-Sale) platforms. Strong expertise in Java, Spring Boot, microservices, distributed systems, and cloud-native applications. Experienced in developing high-performance RESTful APIs, integrating internal and third-party services, and delivering reliable, secure, and maintainable systems in agile environments. Proven ability to work on transaction-intensive applications, optimize system performance, and collaborate across cross-functional teams to deliver business-critical solutions.

WORK EXPERIENCE

Backend Engineer

April 2026 – present

GK Software, Germany

- Backend Engineer on a Point-of-Sale (POS) platform supporting retail transaction processing.
- Designed and implemented using Java and Spring Boot.
- Developed and maintained backend services for sales, inventory, payment, and order management.
- Integrated backend services with POS terminals, mobile applications, and third-party systems.
- Collaborated closely with QA, product managers, and business stakeholders to deliver production-ready solutions.

Backend Engineer

Dec 2024 – April 2026

Cloud Creatures, Malaysia | Marine Insurance

- Backend engineer on insurance platform.
- Designed and implemented REST APIs using Java.
- Improved system performance and reliability.
- Integrated backend services with client platforms.
- Collaborated closely with cross-functional teams to deliver production-ready solutions.

Backend Engineer

Feb, 2024 – Dec 2024

Blibli.com, Indonesia | Unified Loyalty Platform (Cross-Platform Points System)

- Developed and maintained backend services using Java & Spring Boot.
- Worked with Docker, Kafka, Redis, Vault, Consul, and Maven.
- Managed data persistence using MongoDB and PostgreSQL.
- Supported containerized deployments using Rancher Desktop.
- Wrote unit and integration tests using JUnit and Mockito.
- Collaborated with multiple teams to ensure scalable and stable services.

Backend Engineer

Jan 2022 – Feb, 2024

Blibli.com, Indonesia | Office Supplies E-commerce Platform (B2B)

- Built and maintained monolithic backend systems using Java Spring Boot.
- Designed and consumed APIs across internal services.
- Took rotating responsibility as Sprint and Production PIC.
- Handled deployments to staging and production environments.
- Performed code reviews and prepared release notes.
- Contributed to system modernization and upgrade initiatives.
- Implemented automated tests using JUnit.
- Worked closely with product, UI/UX, and regional engineering teams.

Backend Engineer

Aug, 2019 – Jan, 2022

Astra International, Indonesia | Automotive E-commerce Platform (B2C)

- Developed backend services for large-scale e-commerce systems.
- Created REST APIs using Java Spring Boot.
- Integrated third-party services and internal platforms.
- Managed MySQL databases and implemented search indexing using Solr.
- Participated in Scrum ceremonies and agile delivery.
- Conducted code reviews and supported deployments to staging and production environments.

EDUCATION

Bachelor's Degree in Computer Science
Telkom University, Indonesia

2013 – 2019

SKILLS

Backend Development

- Java (Core & Advanced), Object-Oriented Programming (OOP)
- Spring Boot (REST API development, layered architecture)
- MVC / Clean Architecture principles
- Microservices & Monolithic systems
- API design, integration, and performance optimization

Data & Messaging

- Relational & NoSQL Databases: PostgreSQL, MySQL, MongoDB
- Messaging & Streaming: Apache Kafka
- Caching: Redis
- Search & Indexing: Apache Solr

DevOps & Infrastructure

- Docker & container-based deployment
- Rancher Desktop
- Linux & Windows (WSL)
- Environment configuration & secrets management (Vault, Consul)

Testing & Quality

- Unit & Integration Testing: JUnit, Mockito
- Code review & release management

Tools & Collaboration

- Git / SVN (branching strategies)
- JIRA & Confluence
- IntelliJ IDEA & DataGrip
